

PPG IS THE ORIGINATOR & LEADER IN MACHINE COATING TECHNOLOGY

PPG Machine Applied Coatings offers numerous advantages over field applied coatings including:

- Superior quality finish
- Lowers in-place coating costs up to 40% when compared to field finishing
- Lap marks, runs, sags and shrink line defects are virtually eliminated
- Avoids costly job site weather delays
- Backed by PPG Warranty Programs* and the time proven history of quality and success

THE PPG ADVANTAGE

PPG Machine Applied Coatings are the ideal choice for all your siding, trim, decking and fencing requirements. Our authorized network of PPG machine applicators adhere to strict application standards to ensure that the product you receive meets your specification needs. These standards are listed below:

- Substrate to be coated is first inspected and tested for proper moisture content
- Calculations are completed to determine the exact amount of coating to be applied
- Coating is then machine applied in a controlled environment with specific temperature and humidity ranges
 - Ensures an even consistent coat
 - Provides a superior quality finish
- Finished products are properly dried, inspected and can be packaged to specification

* Warranties vary by product and the number of coats applied. Ask your authorized PPG machine applicator for complete details.

PPG MACHINECOAT® EXTERIOR ACRYLIC LATEX FINISH

- Intermix system or 4-base tint system
- Durable 100% acrylic latex formula
- Air-dry or force-dry coating
- Can be tinted to over 1,800 colors
- Ultra protection against harmful U.V. rays
- Can be applied to new wood siding and trim or specific brands of manufactured siding
- 25 year warranty when two coats are applied

PPG MACHINECOAT® SEMI-TRANSPARENT ALKYD/OIL

- Alkyd-based penetrating stain
- Produces a rich color while permitting the wood's natural grain to show through
- Can be applied to new or previously stained wood and trim surfaces

OLYMPIC® PREMIUM SEMI-TRANSPARENT STAIN

- 100% acrylic latex formula provides durable, long-lasting beauty and protection
- SunBlock® U.V. protection protects against harmful sun damage
- Excellent color retention for long-lasting, rich, beautiful color
- Helps prevent unsightly mildew growth on the stain film
- Easy to use, water clean-up

DURACOLOR™ FC

- Specially formulated for fiber cement boards
- 100% acrylic latex formula provides maximum durability and mar resistance
- Provides one-coat hiding on properly prepared substrates
- Satin-like sheen
- 25 year warranty when two coats are applied

Color chips are affected to some degree by lighting conditions, exposure to heat and light rays, and the age of the chip itself. Therefore, there may be a slight difference between the color and sheen of a chip and the actual stain after it is applied to a surface. Photographs contained in these materials demonstrate a desired appearance and may not have actually been created with PPG Machine Applied Coatings.

PPG MACHINE APPLIED COATINGS COLOR SELECTOR

- SOLID COLOR FINISHES
- SEMI-TRANSPARENT STAINS

COLORS THAT OFFER BEAUTY & PROTECTION

PPG is your choice for excellent wood protection and color versatility. Our PPG coatings are available in colors and hues that compliment every style. These colors are specially formulated to provide excellent hiding and durability and offer a wide range of colors for both semi-transparent and solid color finishes to meet application and aesthetic specification needs.

If you don't find a color that meets your criteria, just ask your authorized PPG Machine Applicator about custom matching your color. At PPG, we have the ability to make any color vision a reality.

SEMI-TRANSPARENT STAINS

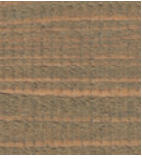

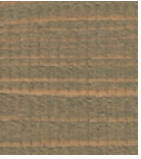

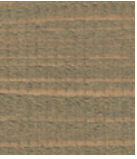

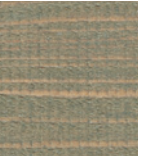

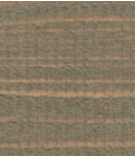

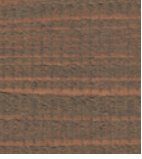

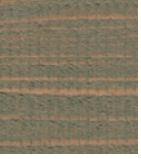

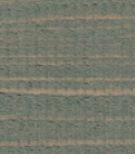

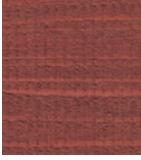

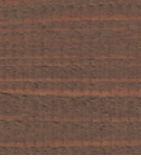

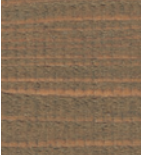

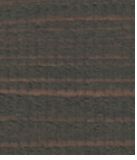

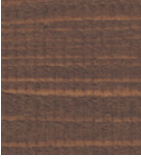

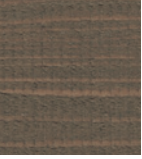

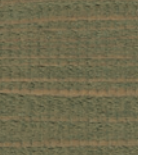

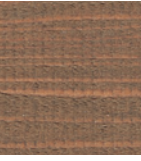

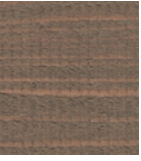

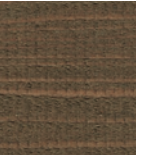

Semi-Transparent Stains add subtle color to the wood, allowing the beauty of the wood grain and natural texture of the wood to show through. These products are recommended for use on exterior wood, fencing, siding, railing, and other wood surfaces.

SOLID COLOR FINISHES

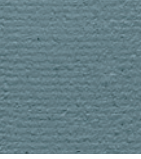

Solid color finishes provide a rich opaque color that hides the wood grain while allowing the texture of the wood to show through. These coatings can be applied to new wood, wood composites, fiber cement siding and trim products.

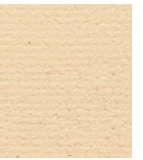

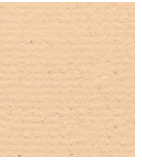

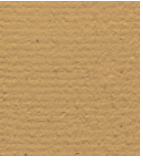

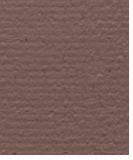

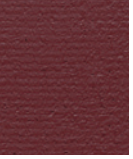

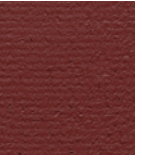

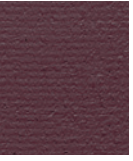

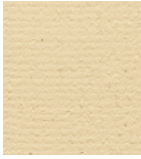

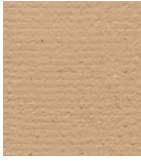

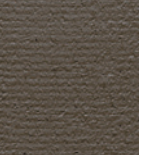

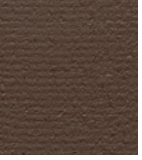

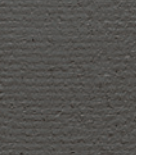

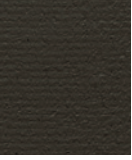

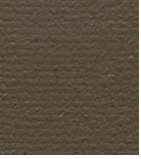

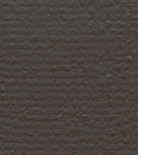

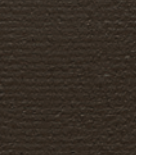

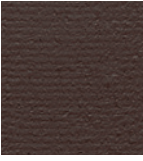

SEMI-TRANSPARENT COLORS

					
					919 Beige Gray
